Review Form 1.6

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|--|
| Compulsory REVISION comments | <p>Title: - Title must not contain any abbreviation like RMGIC.</p> <p>Aim of the study: - What is the novelty of your study?</p> <p>Materials and methods: - What are the three different languages that are used in all documents of your study?</p> <p>Abbreviation: - You mentioned more than one time the abbreviation within the paragraphs and put the meaning of the abbreviations at the last of the manuscript. You must mention the meaning in the first abbreviation presented in the manuscript?</p> <p>Materials and methods: - There was controversy in the radiographical taking during the research. At first in the material and method you write: (A full history and clinical examination including a radiograph of the included teeth) was recorded for each child), then in discussion (No additional radiographic assessments were carried out for all the teeth at follow-ups except for the failed restorations). Mentioned the type of x-ray (device, type, technique) used, the times of using of x-ray during the study. - The following phrase (The placement of RMGIC restoration was in accordance with the protocol for caries removal by Mount, mentioned in the article entitled as "Minimal Intervention Dentistry: Cavity Classification and Preparation" [3] and the manufacturer's instructions for the handling of the material) must be repeated and not mentioned the name of the article, you can mention the only name of author and year with no. of reference. - The following phrase (Data were analyzed at every three-monthly recall interval; reminder phone call was made for follow-ups.) that is present in the result part must be transferred to the material and methods. - Method of fabrication of the metal crown with the hollow technique is not mentioned in the manuscript. - What is the type of product of the RMGIF? - What is the method of isolation used during the research in both groups?</p> <p>Result: - You must transfer the following phrase (Orthodontic separators were used for sixteen teeth (11%) and proximal diskings were performed in seven teeth (5%) out of the 73 teeth with Hall PMCs. It was performed only if participants could not come for the second appointment after 3-4 days.) from the discussion part to the result part. Also, you must give the subject more clearance. - Are you given anesthesia for the patient? What is the type, method of anesthesia, product name, and its expiration?</p> <p>Conclusion: - You must be rephrasing this part where the following phrase can you deleted (In our study, at the 12-month follow-up the HT outperformed RMGIC restorations. However, at 15-month follow-up, the HT and RMGIC restorations success rates were comparable. HT was preferred to RMGIC restorations by children, parents, and the operator, which was statistically significant.)</p> <p>References: - Reference no. 4 must be repeated and include all the authors. - All references were old, where no modern references were presented (last 5 years)</p> | |
| Minor REVISION comments | <p>Abstract: - You can repeat the material and methods, resulting in a more preceded method to give more solidity to your study.</p> <p>Introduction: - You can be shortage the introduction part of your manuscript.</p> | |

Review Form 1.6

| | | |
|----------------------------------|--|--|
| Optional/General comments | Result: - Rephrase the subject (complete and partial loss of the follow-up)? - During doing RMGIF, what is the ratio of class I and class II (not mentioned)? | |
|----------------------------------|--|--|

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
