### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p>A precise rationale for doing this study is missing which needs to be explained in towards end of the 'Introduction' section.</p> <p>All the 'Tables' and Fig 1 that are reflected in the manuscript are not referred to while explaining the outcome or interpretation of the same in the BODY of the manuscript.</p> <p>The results and discussions are combined with very little emphasis on the discussion part. Suggest the authors to re-write this section bringing the correlation between the existing issues with the plain commercially available drug and how the novel formulation (nano constructs drug delivery) is advantage or will have an edge.</p>	
<b><u>Minor</u></b> REVISION comments	<p>The paper is poorly written with a lot of grammatical errors including punctuation marks; first alphabet of many words is in upper case which is not required.</p>	
<b><u>Optional/General</u></b> comments
