

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_83240
Title of the Manuscript:	ELLIS VAN CREVELD SYNDROME- A CASE REPORT
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	-	
<b>Minor</b> REVISION comments	<p>I am honored to be reviewing this article. This article discusses "a case report about Ellis-van Creveld syndrome". I recommend that this paper be accepted after minor revision.</p> <p>Ellis-van Creveld syndrome can be caused by mutations in the EVC or EVC2 gene. The mutations that cause Ellis-van Creveld syndrome result in the production of an abnormally small, nonfunctional version of the EVC or EVC2 protein. Studies suggest that they prevent normal Sonic Hedgehog signaling in the developing embryo, disrupting the formation and growth of the bones, teeth, and other parts of the body. This condition is inherited in an <b>autosomal recessive pattern</b>, which means both copies of the gene in each cell have mutations. The parents of an individual with an autosomal recessive condition each carry one copy of the mutated gene, but they typically do not show signs and symptoms of the condition.</p> <p>In this article, the inheritance of this type of syndrome is expressed as <b>x-linked recessive pattern</b>, but it is better to consider the above.</p>	
<b>Optional/General</b> comments
