PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript is based on research in the scientific literature and presents important data on anti-cancer effect of some hydroxyflavones on human cancer cell. The investigated compounds were tested for anticancer activity and molecular docking studies were performed.	
Minor REVISION comments	Generally, the quality of the article is good and the manuscript is interesting for the readers. English language and style are fine but there are some spelling mistakes. I suggest the authors present the IC50 values in a table. I suggest the authors to correct in the text (in some places), MTT instead of MMT. The authors to check figure no. 2, because there are some data on the graph (fig. 2A) that overlap, and in fig. 2B to be deleted the "axis title" and correct the numbering of columns 2-10. The authors to check the bibliography in terms of uniform writing.	
Optional/General comments
