PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. Improve the introduction part.2. The data must be rewritten and presented with the corresponding statistical analysis.3. The conclusion section could be condensed to a take home message based on the findings in the study. Now a large part is also a summary which could be found in the abstract as well	
Minor REVISION comments	This work is very interesting from the point of view of evaluating antibacterial efficacy. However,: It is necessary to frame the study with a design of experiment on which you indicate the factors that have an impact on the response or your result and add a statistical analysis of your result In my opinion, Authors must take care in this aspect. Without this statistical analysis data, I consider that both, discussion and conclusions could not be valid.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
