PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|--|
| Compulsory REVISION comments | Good study and it is important and crucial topic because of the rising issues of NCD like obesity and its complications However, there is no enough evidence in the introduction to introduce the topic, most of the studies came in at discussion, making it look like a literature review. Review your introduction and make it robust, so as to give a beautiful background and understanding for your discussion. You can pick the references from your discussion and expand them in the introduction . The methodology is not clear. Was this a case-control study? How were the cases and the controls selected? Some little details on their demography will be good since that will really affect their BMI. The t test values were not given, it will be nice to state them | |
| Minor REVISION comments | The explanation for each figure should be separated and not put together. Table two should be explained seperated. Some references dated 1996 should be updated, | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|--|--|
| Are there ethical issues in this manuscript? | <i>(If yes, Kindly please write down the ethical issues here in details)</i> | |
