

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_85665
Title of the Manuscript:	Formulation and Evaluation of Topical Gel Loaded with Fluconazole Niosomes.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The methodology was good, but the author has using solvent chloroform which is used in niosomes production. I think chloroform is very toxic. The polydispersibility index (PDI) was recorded to be 2.917 and 1.418 for formulations FCS and FCT respectively that means tparticle size of he niosomes not homogeneous. I will be slow penetrate during the <i>in-vitro</i> diffusion studies with dialysis membrane using Franz diffusion cells.	
Minor REVISION comments	They can change to DCM (dichlormethane) as solvent which is less toxic.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
