PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Well-written and easy to read and understand. An important study. I suggest for the continuation of this work, which I believe to be more in-depth into the causes of varine resistance and also to determine the best tools to anticoagulant therapy.	
Minor REVISION comments	I suggest a brief chemical and commercial presentation in the country I think that a brief explanation about the pharmacokinetics and pharmacodynamics, for example, it's important. Describe about Absorption... In the methodology, i suggest introduce the concept of cross-sectional study to foster the general understanding of the research	
Optional/General comments
