PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is an interesting prospective study of 50 patients with rectal carcinoma. It demonstrates the standard form of treatment . Even if there is no new evidence, the Authors have shown how in Pakistan patients with rectal canrcinoma are appropriately treated. I have few comments 1-Before accepting the paper, I noticed several misspelling which should be corrected. For instance in the abstract instead of Stahe I, II and III it is written stage 1,11,l111. 2-I would like to suggest to add in the tiltle " in Pakistan"	
Minor REVISION comments		
Optional/General comments
