

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_86607
Title of the Manuscript:	EXTRACTION, PHYTOCHEMICAL SCREENING AND ANTIOXIDANT POTENTIAL OF HYDROALCOHOLIC EXTRACT OF VIOLA ODORATA LINN
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	No apply.	
Minor REVISION comments	No apply.	
Optional/General comments	<p>This an interesting manuscript about phytochemical composition of <i>V. odorata</i> flowers and their antioxidant properties related. It merits to be published. However, before acceptance, please consider the following comments and suggestions: i) In the abstract as well as along the discussion of results, please consider to add a commentary about the quantified values in comparison with other ones previously reported from the same plant or other types of sources. Highlight the insight of these finding; the differences with other studies to orientate to neophytes and to help readers to catch the highlights of this Research. li) In similar manner, in the Introduction if it was previously reported some study related with this flower. Highlight the difference of your work, methodology, result obtained, etc. iii) In the extraction method add a reference if it is applicable. iv) In the Results section, please re-distribute Tables and Graphs through the development of the text after their respective mentions. v) Revise the English writing, grammar, and typing. For example revise the following phrase in page 5 "In the presence of <u>reduced transition metal ions, however, hydrogen peroxide is converted</u> to the much more reactive oxidant, hydroxyl radical in the cells by Fenton reaction". Rephrase it. vi) Maybe the Result section it could be divided in subsections? It is just a suggestion. vii) It is missing a connector between the Result section and Conclusions. Consider to add some concluding phrase of the section of results to close this important section; to then afford the next one. viii) Revise references, and add some more recent report if there is available. If it is not the case; highlight it. Highlight your Research work. ix) Check the quality of Figures.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
