

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_86828
Title of the Manuscript:	Forced Degradation Behaviour with a Developed and Validated RP-UPLC Method for Estimation Lamivudine and Dolutegravir in Combined Pharmaceutical Dosage Form
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journaljpri.com/index.php/JPRI/editorial-policy>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	(1) In Fig. 4 and Fig. 5, It is strange that Chinese appears since this is an English paper. (2) There is no any scale unit in x-axis and y-axis of Fig. 4 and Fig. 5; I cannot see why the author made such a minor mistake. (3) There are so many format mistakes in the paper, maybe the author should be revised again and again. (4) In reference 8, "Journal of Chromatography. 2003; 1(10): 59-67", I cannot find the correct paper.	
Optional/General comments	In this paper, forced degradation behaviour with a developed and validated RP-UPLC Method for Estimation Lamivudine and Dolutegravir was developed. Prior to being published, this research should be revised.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
