Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. Mortality of COVID-19 patients is related to the presence or absence of chronic respiratory disease. Detailed data of chronic respiratory diseases such as COPD, pulmonary interstitial fibrosis and pulmonary hypertension were listed in the recommendations, and relevant statistical analysis was conducted subsequently.2. The article mentioned the use of antibiotics in patients complicated with bacterial infection, but there was no data in the statistical table. It is suggested to add this item and analyze it.	
Minor REVISION comments	<ol style="list-style-type: none">1. When oxygen therapy and non-invasive ventilator therapy are required, it is suggested to increase the data of blood oxygen saturation or blood gas analysis;2. List the clinical classification criteria for COVID-19 referred to in the article;3. Remdesivir was used in patients with liver insufficiency, and the liver function and outcome of patients after treatment were described in the paper.	
Optional/General comments	<ol style="list-style-type: none">1. The research data of the author are relatively complete, which can show more subgroup statistical analysis results;2. BMI of the enrolled patients was increased in the study, and the data of impaired sense of smell or taste were added to the symptoms	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
