### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The use of ...in Nigeria seemed too generalized considering the fact that samples were collected in just a very small area, and localization of the participants. It may be better to add '...South-South Nigeria' even if the state would be excluded</p> <p>The use of 'media' or 'sources' would serve better than 'sites' used in the manuscript.</p> <p>With the sampling method used, could it have affected the outcome of the study? Likewise, the huge sample disparity of low and high income compared to middle income; unlike what was observed for other socio demographic variables.</p> <p>Check the level of significance p-value indicated, should it be &gt;0.05 or &lt;0.05?</p>	
<b>Minor</b> REVISION comments	<p>Minor grammatical error correction</p>	
<b>Optional/General</b> comments	<p>It was a very good exercise, even though KAP studies seem to be common. The focus on the aged made it unique to some extent.</p>
