PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This paper presents a rule-based MT system between the English and a low-resourced language Ebira. The motivation for this work is noble, although there are some issues that need to be address to accept this work.</p> <ol style="list-style-type: none"> 1. The authors should describe the proposed system architecture in more details. The preprocessing method, the Ebira equivalent mapper , synthesizer- these terms should be explained elaborately. 2. The transformation rules tables (1 and 2) contain abbreviations of lexical terms, that need details description. 3. Even for a rule-based system, the sample data is too small (only 200). 4. No related work for rules-based approach, or English-Ebira language pair was mentioned. 5. Little number of references. 6. Overall, the paper needs more justification and organized description of their proposed system. 	
Minor REVISION comments		
Optional/General comments
