PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| Compulsory REVISION comments | <p>The clinical presentation of this patient was not well done and should be redone</p> <p>The methodology of use of the oil was not well describes</p> <p>The discussion should be redone from scratch- There was no discussion – just repetition of results and statement of facts that ought to be in the literature review</p> <p>The conclusions drawn from the study are far fetched as they do not take into cognisance a lot of factors. Acknowledgment of these factors is important and are not to be assumed to be absent</p> | |
| Minor REVISION comments | There are serval deficiencies in grammar and structure. Many incomplete sentences, too long sentences, too many uses of local (Indian) names for terms that could have easily been written in English. Your audience is the world and not india. | |
| Optional/General comments | The figure is not shown and from the description, it should be separated in to two | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
