Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Background : not comprehensible , has to be re-written !!!</p> <p>Type of study : it is a case presentation (so delete “ observational single plan without a control group”).</p> <p>Case presentation Since the injury did not indicate progress, he selected elective treatment for a similar issue without careful medication : what do the author's mean ??</p> <p>Therapeutic Focus and Assessment was brought to a close were stopped</p> <p>Conclusion _(I propose to write)</p> <p>Chronic diabetic wound healing is crucial for the successful treatment of the patient with, pain, foul odor discharge, granulating firm edge, and necrotic slough. This case report tells us that apart from antibiotic, antiseptic, and local steroidal ointments for chronic wounds, the patient has to undergo prolonged treatment for several days, and sometimes oral antibiotics have to be taken, which are expensive. Ingudi seed oil has the potential to heal the complex wounds in shorter time and is less expensive for the patient. This natural oil is a boon for people suffering from non-healing diabetic wounds. Ingudi seed oil is a natural, safe, and inexpensive for treating chronic, non-healing wounds.</p>	
Minor REVISION comments	English language has to be revised	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
