

## Review Form 1.6

Journal Name:	<a href="#">Journal of Scientific Research and Reports</a>
Manuscript Number:	Ms_JSRR_87744
Title of the Manuscript:	Doses of acidity corrective in some chemical attributes to build the fertility of concretionary soils.
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journaljsrr.com/index.php/JSRR/editorial-policy>

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	The work is well written and there are no corrections needed.	
<b>Optional/General</b> comments	The study is interesting and could be of great appreciation, especially for local farmers to increase their production and meet the needs of the region's population. However, it is known that the Cerrado is an extremely threatened biome today and Brazil urgently needs initiatives that aim to preserve this environment. With that, the big doubt would be if this soil correction would de-characterize the biome and if this could be harmful to the survival of the species of fauna and flora endemic to the region?	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
