

Review Form 1.6

Journal Name:	Microbiology Research Journal International
Manuscript Number:	Ms_MRJI_87233
Title of the Manuscript:	Antimicrobial Resistance Patterns of Bacterial Isolates from Tertiary Care Hospital of North India
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalmri.com/index.php/MRJI/editorial-policy>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The paper is acceptable but requires careful revision. The author's writing language needs to be modified and optimized, and the correct writing of various bacteria needs to be carefully checked (for example, the genus name of bacteria can be shortened). The whole paper only describes the drug resistance of bacteria isolated from your hospital, but I think the author should properly analyze and discuss the drug resistance spectrum of bacteria in the results, and put forward clinical countermeasures. In addition, I think the author should also make a clear description of the drug resistance of vancomycin and colistin.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
