### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Discussion section should continue to be improved. For example, further explore the inheritance pattern of the family (autosomal dominant? autosomal recessive? or other). Young patients with POAG should pay special attention to family history; describe and summarize the clinical characteristics of glaucoma in the family (such as the speed of disease progression, etc.)	
<b>Minor</b> REVISION comments	Family genetic testing can be further carried out, which can provide reference for further research on gene therapy for glaucoma.	
<b>Optional/General</b> comments	1.A brief description of the condition of affected patients other than the 8 patients is recommended. 2.Abundant references are recommended. 3.In the abstract section, some descriptions of patients' conditions are repeated and can be omitted.	

### PART 2:
