

Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_77483
Title of the Manuscript:	Evolutionary sequence of spacetime and intrinsic spacetime and associated sequence of geometries in metric force fields~I
Type of the Article	OriginalResearch Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>In this work, the author have tried to show how a new 'three-dimensional' absolute intrinsic metric space, can be obtained by transforming the initial flat of conventional propermetric space into a curved three-dimensional Riemannian metric space without any of its dimension spanning the time dimension. They shows also that in conventional Riemann geometry, an initial flat 'threedimensional' absolute intrinsic metric space (as a flat hyper-surface) along the horizontal, evolves into a curved 'three-dimensional' absolute intrinsic metric space, which is curved (as a curved hyper-surface toward the absolute intrinsic metric time 'dimension' along the vertical, and it is identified as 'three-dimensional' absolute intrinsic Riemannian metric space. They found particularly that the flat 'three-dimensional' absolute proper intrinsic metric space is imperceptibly embedded in the flat threedimensional relative proper intrinsic metric space.</p> <p>Nevertheless, the author have to state the difference between the present work with the one done by Akindele J. Adekugbe title « Evolutionary Sequence of Spacetime/intrinsic Spacetime and Associated Sequence of Geometries in a Metric Force Field. Part Iv. » published as a prepin in 2011.</p>	
Minor REVISION comments	- More references are missing in the document	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
