

## Review Form 1.6

Journal Name:	<a href="#">South Asian Journal of Parasitology</a>
Manuscript Number:	Ms_SAJP_81659
Title of the Manuscript:	Study on Plasmodium vivax density and haematological profile of Malaria patients from North India- A Hospital based prospective study.
Type of the Article	Research article

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journalsajp.com/index.php/SAJP/editorial-policy> )

### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"> <li>1.Necessary research for an important health problem.</li> <li>2. Interesting approach to identify profiles of affectation.</li> <li>3. Authors should explain in the discussion chapter what is new in this research.</li> <li>4.Bibliography seems according to the importance of the studied health problem.</li> <li>5.According with the results of the study which are the final recommendations for all Indian/world clinicians which are daily dealing with suspected malaria?</li> </ol>	
<b>Minor</b> REVISION comments	<p>Line 25: Which is the number of cases?            Line 53: What does OPD mean?            Line 140-142: They are not words directed to a real discussion. Those words are introduction of a problem and should be placed in the correct line.</p>	
<b>Optional/General</b> comments	<ol style="list-style-type: none"> <li>1. The manuscript will win a high level of interest if some statistical predictive analysis could be done: multiple regression analysis for quantitative data (parasitic load adjusted by types of malaria) or logistic regression analysis for qualitative data (yes/no for type of malaria).</li> <li>2. Is true that the study shows a little amount of studied cases (line 167) related with the 10000 total patients visited in the hospital. Authors can explain how difficult is to recruit patients.</li> </ol>	

Review Form 1.6

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
