

Review Form 1.6

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_82997
Title of the Manuscript:	Extended-spectrum β -lactamase enzymes (ESBLs) and Slime Production of some Gram-negative Bacilli Isolated from Human, Animal and Environmental sources in Port Harcourt, Nigeria
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalsajrm.com/index.php/SAJRM/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>When talking about the collection of hospital waste, it is necessary to detail the collection points such as: exit from boilers, bathrooms, restaurant, clinic, laboratory and surgical center</p> <p>Detail how the collection of samples other than human material was carried out, such as intermediate, final or initial sample collection from the collection point</p> <p>what are the inclusion and exclusion criteria used for the selection of samples of biological material from both humans and other samples analyzed in the study</p> <p>Discuss in more detail the E.coli mechanism that in this study was more evident to express ESBL</p>	
Minor REVISION comments	<p>Were the assays performed in triplicate concentration and triplicate experiments?</p> <p>For the collection of human material, it was performed before, during and after the activity that the volunteer was performing.</p> <p>Report details of the environment in which the animals were analyzed, so that it can influence the results</p>	
Optional/General comments	<p>Detail the morphology assay performed in the study</p> <p>Detail the protocol number that releases the ethics committee to carry out this study</p> <p>Authors should better report both the protocol of the biochemical assays described in the text and the results obtained.</p>
