Compulsory REVISION comments	<p>General Comment The study is interesting and highlights the association between Entrepreneurship Pedagogy, Entrepreneurial Intention and Educators' Role Model. The title corresponds to both the theoretical and methodological validation of the paper.</p> <p>Background to the Study In this section, the paper opens the theoretical universe of study in a logic sequence, but there are three parts that I do not find the references and I suggest inserting citation when the author make affirmations about some concepts. Also in the line 2 page 2, I recommend expose some hard data to justify the problem of the study. (Attached to the original text these comments and other minor details)</p> <p>Theoretical Framework The theory of human capital is presented to explain the phenomenon</p> <p>Part 4_ Educators' Role Model as a Mediator I recommended to complete the figure 1 with the hypothesis (Example in the extend)</p> <p>Discussion The discussions clarify the results of the study, and they are edifying by using tables and coefficients to value</p> <p>Bibliography/References These authors is not in the text citations: Lautenschläger, A. and Haase, H. (2011) and Li, L. & Wu, D. (2019)</p> <p>Decision The topic is interesting and current with the suggestion application I suggest publishing it</p>	
Minor REVISION comments	<p>Methodology I recommend exposing that it is a case of study.</p>	
Optional/General comments	<p>Part 4_ Educators' Role Model as a Mediator I suggest in this part left the hypothesis and eliminate from the previous section I considered it is not necessarily duplicated.</p>
