### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	There are 17 variables included in the multiple regression model out of which only five are significant. At least 50 percent of the included variables needs to be significant to generalise the results. Author should have to work further by dropping less irrelevant variables and rerun the model. Repeat this process until you reach there.  References are numbered in the text. But in the reference section they are presented in the alphabetical order. Author has to present them in any format either in number or in alphabetical order.	
<b>Minor</b> REVISION comments	The standard deviation of debt is unexpected, check the result again.	
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
